CASE STUDY

Echoes - A Voice from Unchartered Waters

THE PROJECT AT A **GLANCE**

The art installation 'Echoes - a voice from uncharted waters' by the artist Mathias Gmachl, was on display at the MuseumsQuartier in Vienna, appeals to protect marine animals from the growing noise pollution, which harms their ability to hunt.

Materials

10 Tonnes of [Mild Steel](#) Sheetting

Processes

- [Laser Cutting](#)
- [Water Jet Cutting](#)

Project Type

A fully bespoke set of processed parts to be assembled as a sculpture

Tailored Services

280 uniquely cut components were individually marked and bespoke packaged in groups

OUR INVOLVEMENT

The ParkerSteel processing team used waterjet and laser technology to cut over 280 components, which were all marked and packaged for convenient assembly at Littlehampton Welding Ltd.

Quality Control Check

Precision Laser Cut Parts

DID YOU KNOW...

Whales help create an ecosystem that contributes to at least 50% of all the oxygen in our atmosphere and each whale sequesters 33 tonnes of carbon dioxide. By protecting whales, we protect the planet.

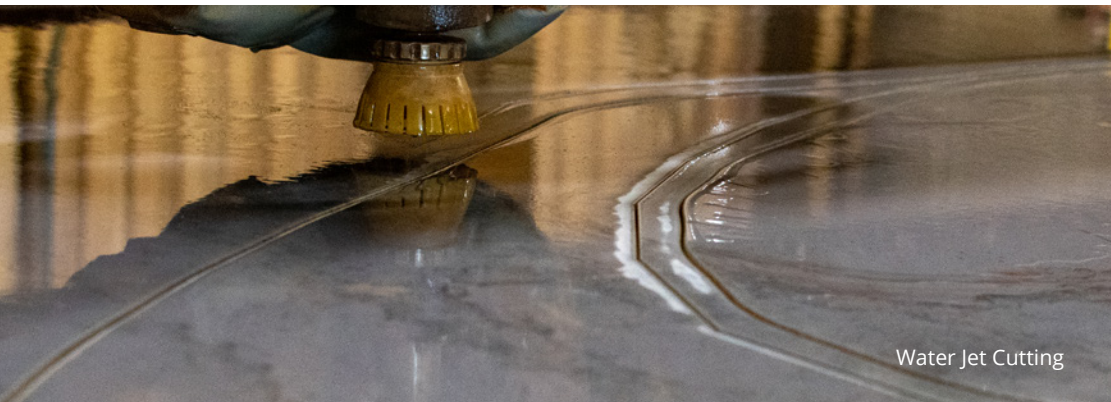

OUR CUSTOMER

Littlehampton Welding Ltd chose ParkerSteel to collaborate on this fascinating project, where the 17 meters long whale sculpture, that is made of our steel, represents all life on earth that is not human and demands some of our public space for itself.

Bespoke Packaging with ID Marking on Each Part

Water Jet Cutting

"ParkerSteel helped make the whole process seamless. The convenience of having all the components marked and intelligently packed made assembly straightforward for us and the precision of the cutting was flawless."

Nathan Saunders - Strategic Operations Director - Littlehampton Welding Ltd
